UNIVERSAL MINI CRYO
surgical unit

Universal Mini cryo unit which is purely a mechanical system works without electricity. It works with CO2 or N2O (min. 750 psi). The accessories are provided with the unit to use N2O. It does not need modification to use CO2 or N2O. There is a manometer on the system to see working pressure (min.-max.). The accessories can be screwed with hand easily. The freezing time: in 30-40 sec. nearly 2,5-3 mm depth. Cryo probes can be sterilized ethylenoxid or formaldehyde. Defrost system is thermal. Defrosting ends in 3-4 sec. Cryo system has a quick exhaust valve the gas quickly to change probe after the operation. This system is produced for dermatology. There are a lot of special cryo probes and tips (optional). The system can be moved easily with the trailer. Universal Mini Cryo Surgical Unit has 2 years warranty for producing mistakes and 10 years warranty for the spares.
